

RM-10809 I support this as the best over all plan for the no code Ham radio license

The Puerto Rico Amateur Radio League (PRARL) asks the FCC to delete Element 1 for Technician and General classes but to increase the rigor of the written elements for those two license classes. The PRARL would keep the 5 WPM Morse exam for Extra applicants. The PRARL also would eliminate same-session retesting and require 30 days between retakes. This is a fair plan
